

JINAN HONGYANG CNC MACHINERY CO., LTD

Changsheng 4.5KW Woodworking Advertising Water-cooled Spindle Motor

 <p>弘阳数控 HONGYANG CNC</p>	model:	GDZ-100-4.5
	Dimensions:	Φ100*260Φm/m
	Rotating speed:	24000RPM
	power:	4.5KW
	Voltage:	220v/380V
	frequency:	400HZ
	Bearing:	Four bearings
	cooling method:	Water cooling
	Chuck nut:	ER20
	Current:	/

1. Changsheng 4.5kw woodworking advertising water-cooled spindle motor should be used with the inverter that has the matched specifications of itself. If these settings are incorrect, the spindle motor will be burned easily.
2. Before every use, the water-cooled spindle motor must ensure that the cooling circulation system of itself is working normally, and it is strictly prohibited to use it without cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing will change. Thus, just like the use of any other [water cooled spindle motor](#) in this series, users should also run this water-cooled spindle at a low speed before its first use.
