## HQD 3.0KW Woodworking Advertising Water-Cooled Spindle Motor

 <p>弘阳数控 HONGYANG CNC</p>	<b>Model:</b>	GDZ-24-1
	<b>Dimensions:</b>	Φ100*255ΦM/M
	<b>Rotating Speed:</b>	24000RPM
	<b>Power:</b>	3.0KW
	<b>Voltage:</b>	220V/380V
	<b>Frequency:</b>	400HZ
	<b>Bearing:</b>	3 BEARINGS
	<b>Cooling Method:</b>	WATER COOLING
	<b>Chuck Nut:</b>	ER20
	<b>Current:</b>	/

1. Just like any other [water cooled spindle](#) in this series, HQD 3.0kw woodworking advertising water-cooled spindle motor should also be used with the matched inverter. Otherwise, the spindle motor can get burned easily.
2. Before every use, the users must make sure that the cooling circulation system of the spindle motor is still working normally, and it is strictly prohibited to use the spindle without enough cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing will change. Hence, it is suggested by HYCNC to run your water-cooled spindle motor at a low speed during its first use.
