

JINAN HONGYANG CNC MACHINERY CO., LTD

JST 800W Woodworking Advertising Water-cooled Spindle Motor

 <p>弘阳数控 HONGYANG CNC</p>	Spindle model:	JGD-65C-800W
	Dimensions:	Φ65*204Φm/m
	Spindle speed:	24000RPM
	Spindle power:	0.8KW
	Spindle voltage:	220V
	Spindle frequency:	400HZ
	Spindle bearing:	Three bearings
	cooling method:	Water cooling
	Chuck nut:	ER11A
	Spindle current:	/

1. JST 800W woodworking advertising water-cooled spindle motor should be used with the matched inverter. The specifications and parameters of the inverter must match the related parameters of the spindle motor. If the settings are incorrect, the spindle motor will be burned.
2. Before using, the [water cooled spindle motor](#) must ensure that the cooling circulation system is working normally, and it is strictly prohibited to use JST 800W woodworking advertising water-cooled spindle motor without sufficient cooling water.
3. During the storage and transportation of this spindle motor, the state of the high-speed grease inside the bearing will change; hence, it is better to run the spindle at a relatively low speed during the first use.
